Bradford City Football Club Limited

Directors Report

The directors present their report and the unaudited financial statements of the company for the year ended 30 June 2025.

Directors
The directors who served the company during the year were as follows:

Stefan Albert Rupp
Alan Keith Biggin FCA

Small company provisions
This report has been prepared in accordance with the provisions applicable to companies entitled to the small companies' exemption.

Review of the Business

As in previous years, and for better understanding of the club's business activities, it has been the club's policy to provide a more detailed analysis of the commercial position and financial statements within a separate Strategic Report. This report is not part of the filing requirements for the club and will be produced in conjunction with these statements by club director and experienced Chartered Accountant Alan K Biggin FCA.

RESULTS

The club statement of comprehensive income is set out on page 5.

The significant figures here are as follows;

(a) Gross profitability has decreased from £842,190 in 2024 to a gross loss of (£822,784) in 2025. This is analysed over the relevant income streams.

	2025	2024
	£	£
First Team (less stadium costs)	(2,414,223)	(1,330,370)
Retail	240,594	197,369
Banqueting & Ground Catering	302,641	262,980
Commercial	1,114,157	1,112,966
Youth Academy	(100,503)	593,941
Donations / Lottery	34,550	5,304
Total Gross (Loss) / Profit before overheads	(822,784)	842,190

(b) Net transfer income of £366,257 has been generated in this current year and is included in football and youth income.

(c) Net loss of (£996,814) in 2024 has been augmented by a further loss in the current year of (£2,992,958).

(d) Net liabilities have increased from an adverse deficiency in 2024 of (£2,483,453) to an adverse deficiency of (£5,476,411) in 2025.

(e) Other creditors falling due within one year have increased from £3,258,629 to £4,056,276 and is largely the result of Income received for season ticket sales and commercial activities which refers to the 2025/2026 season and is correctly deferred.

(f) Average attendances have been at a level of 17,760 over the season and could be considered very satisfactory.

PRINCIPLE RISKS AND UNCERTAINTIES

As I have referred to in many previous years the above 'Risk and Uncertainties' are increased in comparison to other businesses and industries. In particular, the unique considerations and potential conflicting interest of owners, supporters and players are very relevant and would be needed to work to the benefit of all parties. I can, however, confirm that there are processes established to monitor and mitigate areas such as competitive tendering, marketing and key personnel retention. These are to provide assurance to the Board of Directors both in managing risk and ensuring business success. Without appearing to be too irreverent, no system is risk free and it is the director's responsibility to correctly evaluate that. As the Board perceives, the key risks are briefly outlined below.

1. On Pitch Performance

This season was the 122nd in the history of our club. It was also our sixth consecutive season in League Two, which culminated in the never to be forgotten 96th minute of our final league game against Fleetwood Town, watched by over 24,000 fans at Valley Parade. This resulted in our elevation, by automatic promotion to League One. A season which saw us succeed in winning 22 games with 12 draws and 12 losses. Our success in cup competitions was quite limited, but we managed some very respectable performances in the EFL Trophy with a final honourable exit in the semi-final at Birmingham City.

2. Financial Stability

The 'core' risk of any football club is as defined in the heading "It's financial stability". With the ever increasing cost of players' wages and the demand for football success, from an increasing, challenging fan base, the two considerations do not make easy 'bedfellows'. The consequences of these issues is the management of expectations. With skill, common sense and financial acumen, objectives can be achieved but there are no guarantees in a febrile football industry. Our season has been successful and with "good housekeeping", we have avoided some of the pitfalls that befall other clubs. Nonetheless, financial support was also necessary to enhance and achieve these goals, and this should not be overlooked or marginalised as it was critical to the strategy.

3. Safeguarding and Health and Safety

The club operates a strong Safeguarding and Health and Safety Programme and has key employees dedicated to full time roles in these areas. All issues raised are reviewed monthly, along with monitoring controls governing these notifications. All directors and key personnel have completed mandatory safeguarding training demanded by the EFL. It is the club's all-encompassing philosophy that the University of Bradford Stadium environment is safe, open and welcoming for all supporters and visitors to the ground.

4. Salary Management Cost Protocol (SMCP)

Under English Football League rules, the club is bound by the formalities of this covenant to organise its affairs in a financially sound and professional manner, to ensure that management controls are effective. For League Two teams this requires clubs to control their player wages and salary costs at a pre-determined level in relation to turnover (as defined). This is currently at a level of 55% of Turnover and 100% of 'Football Fortune' income which includes equity injections (as defined). However, for the forthcoming season (25/26), for a League Two team, the percentage will change to 50% of football income and 50% of 'Fortune Income'. For League One teams, these figures will become 60% overall. As a club, we comply with this determination as part of our overarching policy of good prudent management. This level is also subjected to strict rules and guidance and in this respect supplemented by the EFL Independent Club Financial Reporting Unit. This may well be enhanced and reviewed by the appointment of David Kogan as the Independent Football Regulator.

5. Going Concern

The directors consider the club to be able to continue as a 'going concern' and along with their acknowledged commitment, conclude that these financial statements reflect the 'going concern' basis.

The club is subject to the normal restraints and difficulties which all businesses encounter and the financial position reflects that challenge. Without the considerable help of the directors and officers throughout the organisation, the problems would become more difficult to address and deal with satisfactorily.

This report was approved by the board of directors on 17th March 2026 and signed on behalf of the board by:

1. General information

The company is a private company limited by shares, registered in England and Wales. The address of the registered office is University of Bradford Stadium, Valley Parade, Bradford, BD8 7DY.

2. Statement of compliance

These financial statements have been prepared in compliance with the provisions of FRS 102, Section 1A, 'The Financial Reporting Standard applicable in the UK and Republic of Ireland'. The Triennial review 2017 amendments to the standard have been early adopted.

3. Accounting policies

Basis of preparation

The financial statements have been prepared on the historical cost basis, as modified by the revaluation of certain financial assets and liabilities measured at fair value through profit or loss.
The financial statements are prepared in sterling, which is the functional currency of the entity.

Turnover

Turnover is measured at the fair value of the consideration received or receivable for goods supplied and services rendered, net of discounts and Value Added Tax.
Revenue from the sale of goods is recognised when the significant risks and rewards of ownership have transferred to the buyer (usually on despatch of the goods); the amount of revenue can be measured reliably; it is probable that the associated economic benefits will flow to the entity; and the costs incurred or to be incurred in respect of the transactions can be measured reliably.

Taxation

The taxation expense when applicable represents the aggregate amount of current and deferred tax recognised in the reporting period. Tax is recognised in the statement of comprehensive income, except to the extent that it relates to items recognised in other comprehensive income or directly in capital and reserves. In this case, tax is recognised in other comprehensive income or directly in capital and reserves, respectively.
Current tax is recognised on taxable profit for the current and past periods. Current tax is measured at the amounts of tax expected to pay or recover using the tax rates and laws that have been enacted or substantively enacted at the reporting date.
Deferred tax is recognised in respect of all timing differences at the reporting date. Unrelieved tax losses and other deferred tax assets are recognised to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date that are expected to apply to the reversal of the timing difference.

Operating leases

Lease payments are recognised as an expense over the lease term on a straight-line basis. The aggregate benefit of lease incentives is recognised as a reduction to expense over the lease term, on a straight-line basis.

Goodwill
Goodwill arises on business acquisitions and represents the excess of the cost of the acquisition over the company's interest in the net amount of the identifiable assets, liabilities and contingent liabilities of the acquired business.
Goodwill is measured at cost less accumulated amortisation and accumulated impairment losses. It is usually amortised on a straight-line basis over its useful life. Where a reliable estimate of the useful life of goodwill or intangible assets cannot be made, the life is presumed to be written off as appropriate.

Amortisation
Amortisation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful life of that asset as follows:
If there is an indication that there has been a significant change in amortisation rate, useful life or residual value of an intangible asset, the amortisation is revised retrospectively to reflect the new estimates.

Tangible assets
Tangible assets are initially recorded at cost and are subsequently stated at cost less any accumulated depreciation and impairment losses.
Any tangible assets carried at revalued amounts are recorded at the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.
An increase in the carrying amount of an asset as a result of a revaluation, is recognised in other comprehensive income and accumulated in capital and reserves, except to the extent it reverses a revaluation decrease of the same asset previously recognised in profit or loss. A decrease in the carrying amount of an asset as a result of revaluation is recognised in other comprehensive income to the extent of any previously recognised revaluation increase accumulated in capital and reserves in respect of that asset. Where a revaluation decrease exceeds the accumulated revaluation gains accumulated in capital and reserves in respect of that asset, the excess shall be recognised in profit or loss.

Depreciation
Depreciation is calculated so as to write off the cost or valuation of an asset, less its residual value, over the useful economic life of that asset as follows:

Long leasehold property	-	Straight line over life of lease or as appropriate
Plant and machinery	-	10% straight line
Fittings fixtures and equipment	-	10% straight line
Motor vehicles	-	15% straight line
Computer equipment	-	10% straight line

If there is an indication that there has been a significant change in depreciation rate, useful life or residual value of tangible assets, the depreciation is revised retrospectively to reflect the new estimates.

Fixed asset investments
Fixed asset investments are initially recorded at cost and subsequently stated at cost less any accumulated impairment losses. Listed investments are measured at fair value with changes in fair value being recognised in profit or loss.

Defined contribution plans

Contributions to defined contribution plans are recognised as an expense in the period in which the related service is provided. Prepaid contributions are recognised as an asset to the extent that the prepayment will lead to a reduction in future payments or a cash refund.

When contributions are not expected to be settled wholly within 12 months of the end of the reporting date in which the employees render the related service, the liability is measured on a discounted present value basis. The unwinding of the discount is recognised in finance costs in profit or loss in the period in which it arises.

4. Profit/loss before taxation

Profit/loss before taxation is stated after charging/(crediting):

	2025	2024
	£	£
Net Depreciation of tangible assets	168,770	119,971

5. Intangible assets
